Child Abuse and Neglect Hotline: 800-800-5556

Dear Fellow Hoosier:

Thank you for reviewing the 2004 Annual Demographic Trends Report for the Department of Child Services. As we form our new department and undergo transforming child services into a system of excellence, we will continue to look at ways we can better serve children and families.

The data in this report is for fiscal year 2004. Under the previous administration, FSSA's Division of Family and Children was responsible for the data seen in this report. As a new agency we are issuing this report to provide relevant information to those interested.

The next five years will show many changes in how we do business in order to provide children with safe, nurturing, and stable homes:

- Better training will be made available to DCS staff
- New family case manager qualifications will be implemented
- More staff will be hired to help us reach the recommended caseload of 12 and 17
- DCS will manage by statistics
- · Regionalization will be implemented and help provide better service to families and children

Thank you for your interest in the well being of children.

Sincerely.

James W. Payne

Director

Protecting our children, families and future

| Child Support Charts and Program Data | 54 – 62 |

The Department of Child Services (DCS) local offices serve children in the state who are at risk of abuse and/or neglect and children and their families where abuse and/or neglect has been substantiated. DCS administers programs that provide family services, child abuse prevention services, foster care, adoption, independent living, residential licensing, residential investigations, and other youth services.

The Family Preservation Program provides services to prevent out-of-home placement or to reunify children and their families in cases of substantiated reports of child abuse or neglect. Program services offered to families include but are not limited to education, counseling, visitation, sexual abuse treatment, parent aides, homemaker services, and home-based family services.

The program carries out these goals by providing four (4) basic services: Service Referral Agreements, Informal Adjustments, Services to a Child in Need of Services (CHINS) and Reunification Services.

- Service Referral Agreements voluntary agreements made by the family case manager, parent(s) and other involved parties when a family admits to a problem, the child is not at serious risk in the home, and no court involvement is sought.
- Informal Adjustments agreements made by the family case manager, the child's parent(s) guardian, custodian, attorney and other involved parties when a family admits to a problem and the child is at minimal risk in the home. The agreement is filed with the juvenile court, must be approved by the court, and may include many of the abovenoted services.
- Services to a Child in Need of Services (CHINS) services to children who are
 victims of child abuse and neglect include case planning, periodic case review and
 many of the services mentioned above. Services are also provided for the child's family.
 CHINS cases are directed and monitored by the juvenile court.
- Reunification Services services provided to families when a child who has been removed from the family has a goal to return to the family. Any or all of the above-noted services may be offered. The objective is to reunify children and their families in cases of substantiated reports of child abuse or neglect. However, the safety of the child remains the priority in the decision to reunify.

The State of Indiana has developed a five- (5) year plan for child welfare services with the help of community partners. The five- (5) year plan is funded by several funding streams including Title IVB Part II monies. The 5 year plan can be located at http://www.in.gov/fssa/families/protection/2004-2009statecw5yearplan.doc .

The Family Preservation Program provides services to prevent out-of-home placement or to reunify children and their families in cases of substantiated reports of child abuse or neglect. Program services offered to families include but are not limited to education, counseling, visitation, sexual abuse treatment, parent aides, homemaker services, and home-based family services.

Family preservation expenditures largely reflect the cost of home and community-based services to children and their families who are under the supervision of the local office of family and children, and have been placed in their own homes. However, some of these costs are spent on home and community-based services to families of children who have not yet been returned home. The

Prepared by: Office of Data Management

Source: Department of Child Services

purpose of these services is to prepare the family for the safe return of the child.

Child Welfare expenditures include Foster Care (IV-E), Adoption Assistance, Child Welfare Assistance, Non-Recurring Adoption Expense and Independent Living. Child Welfare expenditures have steadily increased over the last 10 years going from 187 million in 1994 to 345.1 million in 2003.

SFY 2004 Child Welfare Expenditures

| TOTAL | 362.3 |
|--------------------------------|-------|
| Independent Living | 1.6 |
| Non-Recurring Adoption Expense | 1.1 |
| Child Welfare Assistance | 275.4 |
| Adoption Assistance | 42.5 |
| Foster Care (IV-E) | 41.7 |

Child Protection Services (CPS) operates a toll-free hotline (1-800-800-5556) for people to call and report suspected cases of child abuse or neglect on a statewide basis. The 1-800 number connects to the local DCS office where the telephone call originates. Although reports can be made in person or by correspondence, the vast majority of child abuse and neglect reports are made by telephone. CPS receives and initiates investigations of abuse reports on a 24-hour basis. Reports that are made via third parties or from people who may not have first knowledge of the conditions or incident must still be evaluated upon the same merits as other reports. Anonymous reports are accepted.

Investigations of abuse and/or neglect may be substantiated, unsubstantiated or indicated. The child's safety is the primary factor in all CPS investigations. Families receive services based on an assessment of the child's and the family's needs, and an assessment of the relative safety and risk to the child in the home.

In Indiana, abuse and/or neglect occurs when a child who has not yet attained the age of 18 experiences a condition in which:

- 1. the child's physical or mental health is seriously impaired or seriously endangered as a result of the inability, refusal or neglect of the child's parent, quardian, or custodian to supply the child with necessary food, clothing, shelter, medical care, education, or supervision (IC 31-34-1-1).
- 2. the child's physical or mental health is seriously endangered due to injury by the act or omission of the child's parent, guardian, or custodian (IC 31-34-1-2). This section would address inappropriate discipline and an allegation that the illegal manufacture of a drug or controlled substance is occurring on property where a child resides.
- 3. the child is a victim of one or more of the following sexual offenses (IC 31-34-1-3); Rape (IC 35-42-4-1), Criminal Deviate Conduct (IC 35-42-4-2), Child Molesting (IC 35-42-4-3), Child Exploitation/Child Pornography (IC 35-42-4-4), Child Seduction (IC 35-42-4-7), Sexual Misconduct with a Minor (IC 35-42-4-9), Public Indecency/Indecent Exposure (IC 35-45-4-1), Prostitution (IC 35-45-4-2), or Incest (IC 35-46-1-3).
- 4. the child's parent, guardian or custodian allows the child to participate in the performance of sexual activity as defined by IC 35-49-2-2 (Matter if Performance Harmful to Minors) or IC 35-49-3-2 (Obscene Performance).

Prepared by:

Office of Data Management

5. the child's parent, guardian, or custodian allows the child to commit indecent acts or prostitution prohibited by IC 35-45-4.

Children in Need of Services, as defined in IC 31-34-1-6 through 31-34-1-8, are not considered to constitute abuse or neglect but are included as they may result in intervention with the family and child. These categories are:

IC 31-34-1-6 Child substantially endangering own or another's health

IC 31-34-1-7 Parent, guardian, or custodian failing to participate in school disciplinary proceeding IC 31-34-1-8 Missing child.

IC 31-34-1-9 (Disabled child deprived of necessary nutrition or medical or surgical intervention) specifies that all the CHINS categories include a child with a disability who is deprived of necessary nutrition or medical or surgical intervention generally provided for similarly situated children with or without disabilities.

IC 31-34-1-10 and IC 31-34-1-11 are part of the definition of a child in need of services based on child abuse/neglect as defined in IC 31-9-2-133 concerning a victim of child abuse or neglect.

IC 31-34-1-10 defines a child is a victim of abuse or neglect if the child was born with fetal alcohol syndrome or any amount of a controlled substance or legend drug in the child's body.

IC 31-34-11 defines a child as a victim of child abuse or neglect if the child has an injury or any abnormal physical or psychological development or has a substantial risk of a life threatening condition that results from the mother's use of alcohol, controlled substance, or legend drug while pregnant with the child.

Acts and circumstances that are suspected of falling within these parameters of child abuse and/or neglect are subject to the mandatory reporting requirements.

Institutional Child Protection Services

Child Protection Services **includes** investigating allegations of child abuse and/or neglect in any institutional or out-of-home care setting. Reports are received at the local office, and investigations of abuse are initiated within 24 hours. This program determines whether the child should remain at the facility or home, whether adequate protection can be provided, whether referrals are needed for follow-up monitoring, and whether referral for prosecution of perpetrators is warranted (substantiated cases).

Facilities could include Child Care Center (licensed and unlicensed/exempt), Child Care Home, Foster Family Home, Group Home, Registered Child Care Ministry, Residential Facility, School, State Institution, Hospital, Other. Perpetrators could include facility staff and other residents.

Child Fatalities

A child fatality review process has been in place since SFY 1999 to improve information gathering and prevention strategies in the area of child fatalities due to abuse and neglect. All counties have fatality reviews by policy as an extension of community child protection teams or via a legislatively approved team (IC 12-13-15). An internal state team reviews detailed information regarding each death involving substantiated abuse and neglect and shares aggregated information with community partners to develop prevention strategies. The annual Child Fatality Report is located at http://www.in.gov/fssa/statistics/pdf/2005-02-08childfatilityreport.pdf

Abuse and Neglect SFY 2004 Annual Report

Indiana Kid's First Trust Fund

In a prevention effort, the Indiana Kid's First Trust Fund collects revenues from the "Kids First" license plate and distributes the funds through grants to agencies dedicated to preventing child abuse and neglect.

The goal of the Indiana Kid's First Trust Fund is to provide primary and secondary prevention services to Indiana's children to help ensure that they are not abused or neglected. The Kid's First Trust Fund grant recipients work to provide practical solutions that teach good parenting skills, including the importance of nutrition, how to be an active parent and how to discipline without spanking the child. Other programs provide children with encouragement that helps them grow up healthy and break the intergenerational chain of abuse and neglect.

The Kid's First Trust Fund sends contributions from Kids First license plate sales directly to local community programs that prevent the tragedy of child abuse and neglect. Income for the Kid's First Trust Fund comes from "Kids First" plate sales, fee collections (marriage & divorce filing fees), heirloom birth certificate sales, cash donations and interest. For additional information about the Kid's First Trust Fund, please visit the website at http://www.in.gov/fssa/children/grant.html

Indiana's Foster Care Program

Indiana's Foster Care Program provides 24-hour care to children who can no longer safely remain in their homes due to the occurrence or risk of abuse or neglect, or due to their own need for care and treatment for behaviors which constitute a danger to themselves or others.

Children may be placed in an approved relative home, a licensed foster family home, a group home or child-caring institution, or other court-approved facility.

State policy is to place children in the least restrictive, most family-like setting which meets the child's needs. When possible, a child is placed in close proximity to the child's family, particularly when reunification with the family is the case plan goal.

Foster parents and other care providers work to help reunite a child with a biological parent, or care for a child until that child is adopted. Foster parents and child care professionals are involved in case planning and provision of services to the child and the child's family utilizing a team approach with the child's case manager. Local office staff ensure that foster parents receive proper notification concerning case activities of children in their care.

Title IV-E Foster Care Program

Prepared by:

The Title IV-E Foster Care Program provides federal funds for foster care or residential care per diem payments for children whose families would have been eligible for Temporary Assistance for Needy Families (TANF) using the 1996 standards.

By claiming federal IV-E reimbursement local offices can maximize the financial resources available to serve children and families in their communities. Eligible services include maintenance payments

Office of Data Management

Source:

Department of Child Services

such as food, clothing, shelter, daily supervision, school supplies and liability insurance.

IV-E Waiver Program

In July 1997, the federal Department of Health and Human Services approved Indiana's application for a Child Welfare Demonstration Project, also known as the IV-E Waiver Project. The waiver redesigns the current federal reimbursement system for funding children's services. It emphasizes a more aggressive development of a family focused, community based service delivery system for children in care. The goal of the waiver is to stimulate the growth of community based children's services, thereby shifting significant costs from out-of- home care to services to children and families in their own homes. Each child in the project must have a plan for services approved by the local judge with juvenile jurisdiction.

Indiana was the seventh state to have been approved for the IV-E Waiver Project and the only one whose waiver program is statewide. Indiana's project was the largest in scope and involved the use of foster care funds in a more flexible approach to meet the needs of children and their families. Interagency agreements for the waiver are in place in each of the 92 counties between the local judge, probation officers and the local office Director. The waiver applies to 4000 children at any given time and does not require that the children be removed from the homes in order to access federal funds.

IV-E Reimbursement

The claiming of federal IV-E reimbursement is a high priority for the Department. By claiming effectively, local offices can maximize the financial resources available to serve children and families in their local communities. Reimbursement claims are possible in a case when there is a combination of an eligible child, an eligible facility and eligible costs.

For a child to be eligible, he or she must be under age 18 and must meet 1996 AFDC eligibility requirements at the time of removal. In addition, there must be a judicial finding in the child's case that it was contrary to the child's welfare to remain at home and that the state provided services to prevent the child's removal from home, or that reasonable efforts to return the child home were not required. Reimbursement claims are possible in a case when there is a combination of an eligible child, an eligible facility and eligible costs.

A facility is eligible if it houses no more than twenty-five children. In addition, the facility must be licensed by the state, and must not be primarily for detention purposes. Eligible services include maintenance payments such as food, clothing, shelter, daily supervision, school supplies and liability insurance.

Adoption Program

Indiana's Adoption Program serves children who are legally available for adoptive placement and who need a permanent family. The State Adoption Program includes recruitment activities and services to the prospective adoptive family, as well as financial support and services to the family receiving the child.

The objective of Indiana's Adoption Program is to find permanence with a family for all Indiana children who are legally available for adoption.

Many of the children in the state system are considered special needs children – children over two years of age, member of a sibling group, or with a mental, physical and/or emotional challenge – who can be more difficult to place. To accommodate the needs of these children, the Special Needs

Prepared by: Office of Data Management

Department of Child Services

Source:

Adoption Program (SNAP) was implemented in 1990 to recruit and support adoptive families for this special population.

Special Needs Adoption Program

The Special Needs Adoption Program (SNAP) implemented in 1990 recruits adoptive families and facilitates the adoptive placement of children with special needs.

The adoption program works in partnership to recruit minority adoptive families, facilitate the adoptive placement of children with special needs and provide the community at large an educational service regarding the needs of adoptive children. Special needs children are usually age 2 or older. Many are of minority background, members of a sibling group that need to be placed together and/or have been diagnosed with developmental, psychological or medical/physical challenges. It is rare that a child involved with DCS for adoption does not have some type of special need.

The Special Needs Adoption Program employs regional adoption casework specialists to recruit adoptive families as well as work with children and families in order to facilitate the adoptive placement of children who have special needs.

Indiana's adoption initiatives have resulted in an increase of finalized adoptions from 464 in 1996 (prior to state funding launching these initiatives) to 1152 in 2000, 956 in 2003, and 1054 in State Fiscal Year 2004.

All DCS Children (including SNAP) Finalized Adoptions State Fiscal Years 1999 – 2004

| 1999 | 2000 | 2001 | 2002 | 2003 | 2004 |
|------|-------|-------|-------|------|------|
| 962 | 1,152 | 1,178 | 1,055 | 956 | 1054 |

Figures are based on a **State Fiscal Year** (July – June) for 1999-2004 This data does **NOT include private adoptions.**

Source: ICWIS

Financial assistance programs available for families who adopt eligible special needs children include:

- **Non-Recurring Adoption Expenses Program** provides funds to reimburse the adoptive parent for one-time expenses incurred in legally adopting a special needs child.
- **Federal Adoption Assistance Program** provides financial assistance to families who adopt IV-E eligible children via per diem payments. The child is eligible for Medicaid.
- County Adoption Subsidy Program provides financial assistance to families who adopt children with special needs and demonstrate to the court that per diem and/or medical assistance is needed in order to meet the adopted child's needs.
- Indiana Adoption Subsidy Program provides medical assistance to families who
 adopt children who have county subsidy maintenance or health subsidy and an existing
 medical condition.

For more information about Indiana's Adoption Program, visit the website at

http://www.in.gov/fssa/adoption/.

Indiana Adoption History Program

The Indiana Adoption History Program was established as a result of enabling legislation passed in 1993. The purpose of this program is to assist persons seeking information regarding adoptive situations to which they were a party. The Indiana State Department of Health (ISDH) is responsible for administering the program, but the county offices play a major role in assisting persons to obtain information not available through ISDH. Parties to an adoption may obtain non-identifying information from the county offices without a court order if it is available. However, no identifying information may be released by a county office without obtaining permission from ISDH to do so, since certain signatures must be on file before identifying information can be released.

Interstate Compact on the Placement of Children

The Interstate Compact on the Placement of Children is designed to protect the interests and safety of all children in state custody who are being placed in out-of-home care or for private adoption across state lines and national boundaries. This compact provides a mechanism for the approval of the placement of children into relative, foster, or adoptive homes or into residential facilities and for on-going monitoring of the children's progress in these out-of-state placements.

Residential Licensing Sections

The Residential Licensing Sections of the Bureau have licensing authority for a number of facilities and homes. The primary purpose of licensing of foster family homes is to minimize the risk to children in out-of-home care by monitoring and enforcing compliance to minimum health, safety, and program standards as established in 470 IAC 3-1.

Local Offices and licensed child-placing agencies have the responsibility and the authority to assess compliance with these standards and to submit licensing recommendations to the Bureau of Family Protection and Preservation.

Also, the section collaborates with the State Fire Marshal's Office, the State Department of Health, and the office of the State Building Commissioner. These cooperative efforts ensure that minimal standards of fire and building safety and public health protection are maintained for children in child (day) care centers and homes.

The Section also issues licenses to residential child care institutions and group homes. Child caring institutions are agencies which provide 24-hour residential care for dependent, neglected, abused, delinquent, or troubled children who are unattended by a parent, guardian, or custodian. The minimum standards for child institutions servicing 11 or more children are found in 470 IAC 3-11 and 470 IAC 3-12. The minimum standards for group homes (agencies serving ten or fewer children) are found in 470 IAC 3-14 and 470 IAC 3-15. The Bureau also has authority to license private secure facilities. The minimum standards for private secure facilities are found in IAC 470 3-13.

The Department of Child Services in conjunction with state fire inspectors monitors and reviews compliance to these standards at least annually in an effort to maximize the health, safety, and well-being of children placed in these residential treatment programs.

Department staff additionally issues licenses to child-placing agencies. Child-placing agencies are authorized to recruit foster parents and to make foster family home licensing recommendation to the DCS, to complete adoptive home studies, and to place children in either foster homes or adoptive homes. Some child-placing agencies provide only foster care services while others provide both foster care and adoptive services including therapeutic foster care and international adoptions.

Assisted Guardianships

Assisted Guardianship is a possible permanency option for children under the supervision of the Department of Child Services, and is considered when an older child is placed with relatives who promote a permanent, long-term living arrangement that is in the best interest of the child.

This option is available after a court has determined that reunification with the child's parents is no longer feasible, and that adoption is not in the best interest of the child. Both the child and the relatives must meet specific eligibility requirements, and the program calls for a monthly subsidy to be provided based on the need of the child as defined by Temporary Assistance for Needy Families (TANF) guidelines.

Chafee Foster Care Independence Program

Chafee Foster Care Independence Program (CFCIP) provides the state with funding to purchase direct services for youth (ages 14-21) living in foster care who have aged out of foster care. The funding is to be used to help the youth transition to self-sufficiency. Services that can be purchased through this program include: education, training and related services; services to prepare for and obtain employment; services to prepare for and enter post secondary training and educational institutions; services to provide personal and emotional support to youth through mentors and the promotion of interactions with dedicated adults. Room and Board types of expenses can be offered to former foster youth (ages 18-21) who were in care on their 18th birthday.

Contracts and Grants

Contracts and Grants are administered through the DCS, and responsibilities for the ten funding sources are contracted out to private agencies throughout the state for the provision of direct services. The federal funding sources are:

- Chafee
- IVB I & II
- Social Services Block Grant
- Community Based Family Resource and Support Grant

The state funding sources are:

- Project Safe Place
- Youth Service Bureau Fund
- Kid's First Trust Fund (license plate sales and other donations)

These funds are allocated on a competitive basis to agencies providing services in these categories:

• Family Planning, Youth Services, Child Abuse Prevention, Families and Children Services and Independent Living Services

Healthy Families

Over nine years ago the Family and Social Services Administration launched the Healthy Families Indiana home visiting program with a vision of supporting and educating new parents, beginning at or before their baby's birth. The program has grown into a statewide voluntary home visiting initiative with the following three goals: to promote positive parenting, to encourage child health and development, and to prevent child abuse and neglect. By working closely with hospital maternity wards, prenatal clinics, and other local agencies, Healthy Families systematically identifies families that could benefit from these education and support services either before or immediately after birth.

Prepared by: Office of Data Management

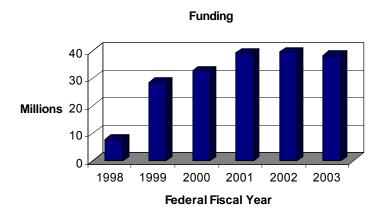

Department of Child Services

Source:

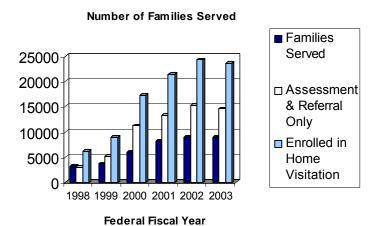

The growth of the Healthy Families Program throughout Indiana has been unprecedented. Currently, 56 Healthy Families Indiana sites are providing services to families and children in all 92 counties. Prevent Child Abuse America and Healthy Families America credentialed Healthy Families Indiana as a statewide, multi-site system on June 9, 2004. For a detailed listing of the sites by county please refer to: http://www.in.gov/fssa/families/protection/hfisites.html. Prevent Child Abuse America Healthy Families America (HFA) designates Healthy Families Indiana as the HFA Midwest Regional Resource Center of Excellence. Indiana is widely recognized as a national model for the Healthy Families America initiative because of the extensive training services. In order to maintain support of Healthy Families rapid expansion, multi-level leadership from the public/private sector is critical to the program. Current partnerships include but are not limited to: First Steps Early Intervention, Women, Infants and Children (WIC), Early Head Start, Head Start, Office of Family and Children, Division of Mental Health, Juvenile Justice Institute, and Hospitals.

The expansion of Healthy Families demonstrates how the program has grown in program funding and families served since it's inception in 1994.

Funding is a combination of local, state and federal dollars.

Prepared by:
Office of Data Management

Source: Department of Child Services

The number of families served has increased from 760 in 1994 to 23,554 in 2003

For additional information about the Healthy Families Indiana Program, please visit their website @ http://www.in.gov/fssa/families/protection/dfchealthy.html

Policy Changes Effecting the Data Collection Methods

Here is a list identifying some of the changes in the data collected over time. This will be helpful when viewing data for trend analysis. It may help explain some variances in the data from year to year and facilitate interpretation of the data. Understanding what the data is actually reflecting about program activity is crucial for program development and policy making.

- During 1995 and 1996 the ICWIS was designed and developed by Unisys Corporation.
- In March 1997 the system was implemented in all 92 counties. Each county works from an independent data system. Each night data from all 92 counties is downloaded to a centralized data system in Indianapolis. The reason for the independent nature of the counties data systems is to assure confidentiality of clients.
- Prior to 1996, abuse/neglect reporting was based on a hierarchy of abuse with sexual being the most severe followed by physical and last by neglect. That meant if a child suffered multiple types of abuse/neglect, only the single most severe type was reported. Due to a change in the federal reporting requirement in 1999, ICWIS was required to report all incidences of abuse/neglect so one child could potentially have multiple reports of abuse/neglect. Therefore, comparisons of data before and after 1999 are not feasible.
- There are two types of duplications possible in abuse/ neglect data. One is where the report of abuse/neglect can indicate more than one type of abuse/neglect, i.e. sexual abuse, physical abuse or some combination with neglect where the child is counted once for each type of abuse/neglect in the report. The other is where there is more than one report of abuse/neglect for a child in the year and the child is counted for each report, but only counted once under one category of abuse/neglect for each report.
- The counties during 1997-1999 did manual reporting as they transitioned into ICWIS. In 2000, an influx of transitional information was entered into the data reporting system. A policy directive mandated all child welfare workers to enter all their cases into ICWIS. This involved a massive effort of entering cases opened in previous years but not entered. So old cases, intakes and investigations from 1997-1999 were entered into the system and reflected in 2001 data resulting in higher numbers reported for 2000-01.
- The indicated category was included in the abuse/neglect reporting from 1993 1995. Indicated is used when child abuse and/or neglect reports were made and there was not enough evidence to substantiate or unsubstantiated the report but there was a reason to suspect the child may have been maltreated or was at risk for abuse and/or neglect. Indicated was included in the reporting of substantiated abuse cases from 1993 1995. The status indicated was discontinued in 1995. The inclusion of indicated cases with substantiated cases from 1993 –1995 appears to have resulted in higher numbers of abuse being reported compared to subsequent years.
- Per HEA 1194-2003, effective 7-1-04 indicated status was again being reported.

- Abuse/Neglect data on unsubstantiated investigations from 1997 2000 was expunged
 after six months and aggregate numbers were not retained for these investigations for the
 years 1997 2000. This practice resulted in lower numbers being reported for
 unsubstantiated investigations for this period of time. Since 2000, aggregate data for
 unsubstantiated investigations has been collected and reported.
- ICWIS utilizes a point in time reporting format. Report is a snapshot of what is known on the last day of the month. Over the course of the year the user makes updates and modifications to the data so if pulled again it reflects differently. A point in time average for a specified period of time can be calculated using the count of children at the end of each month divided by the number of months specified.
- Data within ICWIS is dynamic which means data changes day by day according to new data entries from the field. Thus reports from ICWIS have the potential for showing different data from the same report if pulled after an update to the Central Database or individual counties databases.
- Adoption data in ICWIS for 1990-2001 was based on numbers self reported by local
 offices for all children in DCS custody who were adopted. Since this adoption reporting
 was done manually, the reliability of the data can not be verified. ICWIS data does NOT
 include private adoptions. In 2002, a policy decision was made to discontinue use of
 manual reporting for adoptions, and rely solely on data entered into ICWIS for adoption
 counts.
- Prior to 10/15/04, institutional investigations were counted in Central Office. Beginning 10/15/03, institutional investigations are counted in the county in which they occur.

Indiana Child Welfare Information System (ICWIS)

Project Description

During 1995 and 1996, the Indiana Child Welfare Information System (ICWIS) was designed and developed. This system provides Indiana with child protection services, intake capabilities as well as case management and administrative management capabilities. This statewide system allows the child welfare staff in local offices of the Department of Child Services to record all calls, whether for voluntary services or to take a report of a suspected case of child abuse or neglect. The system performs historical searches to identify prior involvement in child abuse or neglect, identifies types of service needed and potential service providers for those services. It records the relationships and roles of the individuals, records the types of abuse or neglect, and recommends to the local worker the time frames for response and the type of response to meet the situation. Contained within the system are risk, needs, strength, assessment tools, and a central statewide client index.

The technology provides a vehicle to record the processes and procedures used by both local and central office child welfare staff. This system promotes consistency of policy across the state in assessing risk for abused/neglected children, as well as matching resources to family needs more effectively. The system also provides strong security for the information it collects. Indiana has very specific confidentiality requirements and the system enforces those requirements. This helps to prevent inappropriate sharing of abuse and neglect information.

Reporting

Department of Child Services

ICWIS provides data collection for Adoption and Foster Care Analysis and Reporting System (AFCARS) and National Child Abuse and Neglect Data System (NCANDS) reporting. ICWIS also provides statistical support for identification of services, as well as information that provides the opportunity to plan and target funding toward the development or needed services. ICWIS utilizes a point in time reporting format for the majority of the reports, however, real time data reports can also be generated. A point in time report is a snapshot of what is known on the last day of the month. Over the course of the year the user makes updates and modifications to the data so if pulled again for the same period of time it reflects differently.

In the mid-1990s, the federal government began requiring that all states implement an electronic method for their Adoption and Foster Care Analysis and Reporting Systems (AFCARS). Along with that requirement came federal funding, with the government reimbursing 75 percent of the costs to implement such a system. During 1995 and 1996, the ICWIS was designed and developed by UNISYS Corporation. The system was implemented in all 92 counties by March 1997. Each county works from own independent data system. Each night all 92 counties are downloaded to a centralized data system in Indianapolis to assure confidentiality of clients.

Technical Description

ICWIS is a three-tiered client/server application. An Ethernet LAN links client workstations to county servers. Each county server is connected to the primary server in Indianapolis over a highspeed frame relay network. E-mail and bulletin board capabilities are available to all 1400 users. The system is an Oracle database using PowerBuilder screens on an IBM server using Microsoft NT or higher.

Contracts

Prepared by:

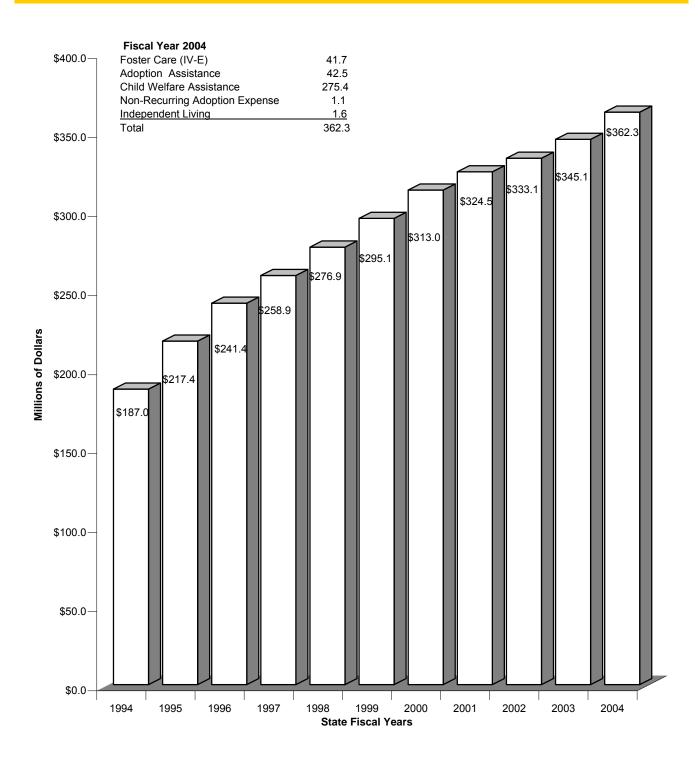

Office of Data Management

Unisys Corporation provides application maintenance, modifications, and enhancement services for ICWIS. Invoice is based on usage as defined in the contract.

Substantiated Investigations of Abuse and Negelct By Sex of Perpetrator

State Fiscal Year 2004 (07/01/2003 - 06/30/2004)

| Sex | Physical Abuse | Sexual Abuse | Neglect |
|---------|----------------|--------------|---------|
| Female | 1,450 | 280 | 7,426 |
| Male | 1,928 | 3,835 | 3,735 |
| Unknown | 102 | 75 | 74 |
| Total | 3,480 | 4,190 | 11,235 |

On all tables, the same perpetrator may be counted in more than one category for the same investigation.

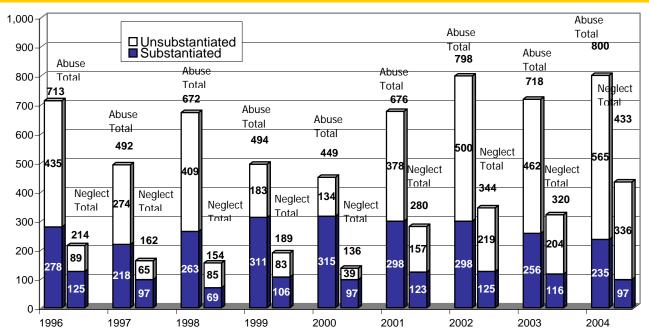

Prepared by: Office of Data Management

Page 32

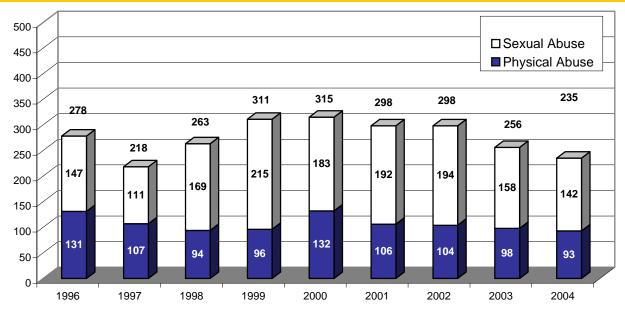

Institutional Child Abuse and Neglect Reports State Fiscal Years 1996 to 2004

Data from 1996 to 1998 used Federal hierarchy. Each Investigation is counted in only one category per investigation. From 1997 to 2000, unsubstantiated cases were expunged and no aggregate data was kept.

Data from 1999 to 2003 the same investigation may be counted in each category. So a case with Physical and Sexual Abuse may be counted twice in the abuse total.

Child Support

In 2005, the Bureau of Child Support was incorporated into the newly created Department of Child Services (DCS). DCS was legislated as the state agency to oversee child welfare issues. The Bureau of Child Support helps Indiana's children and families by enforcing parental responsibility through the collection of payments by non-custodial parents. The Child Support Program provides a full range of child support services including establishment of paternity, establishment and enforcement of child support orders, collection and distribution of child support payments, and location of absent parents.

Title IV-D (Child Support and Establishment of Paternity) of the Federal Social Security Act, enacted in 1975, required that a Child Support Program be established in every state that chose to participate in the IV-A programs. The Child Support Program became effective in Indiana on October 1, 1976 under the provisions of IC-12-17-2. The Indiana Child Support Program is administered by the Child Support Bureau of the Indiana Department of Child Services.

In Indiana, the Child Support Bureau has entered into cooperative agreements with the local county prosecutors in all Indiana counties to provide child support enforcement services. The Bureau also has cooperative agreements with the Clerks of Circuit Courts for collecting support payments and with several courts to set up Special Hearing Officers specifically to adjudicate Title IV-D cases.

Every child has the right to the care and support of both parents whether or not the parents are married or both in the home. The child support program enforces this right. Child support services are offered through local County Prosecutors' Offices. These services include:

- Locating absent parents
- Establishing paternity
- Establishing and enforcing support orders
- Establishing and enforcing medical support orders
- Collecting current and past due support payments
- Review and adjustment of current support orders

This program is available free of charge to anyone receiving TANF, Hoosier Healthwise or Medicaid for their children. Parents receiving TANF or Medicaid for their children are required to pursue child support services (the IV-D program) through the local County Prosecutor's Office.

Any other family that is in need of these services can receive them for a one-time application fee of \$25.00. Anyone interested in receiving these services can do so by their local County Prosecutors Office. In order to receive the child support services of the Prosecutor's office, it is critical that all necessary information is provided by the person applying for services. All information requested is necessary in order to provide the best possible service. All information provided is strictly confidential.

The Child Support Program has several tools available to enforce child support obligations. These tools include:

- Income withholding
- Liens of property

Office of Data Management

Prepared by:

Interception of income tax refunds (state and federal)

Source:

Department of Child Services

- Interception of unemployment compensation benefits.
- Interception of lottery winnings
- Credit bureau reporting
- Driver and professional, and recreational license suspension
- Financial institution data cross matching
- New hire reporting
- Computer automation of its operations, including interfaces with numerous other computer systems.
- Child support action plans in all 92 local offices aimed at improving communications with local child support offices and improving service to the public.
- An automated child support system
- A web site for employers to process income withholding on line.

The impact of the Child Support Program collection efforts for the citizens of Indiana can be seen in the collection figures for the State Fiscal Year ending June 30, 2004. During this year the Child Support Bureau collected \$454,873,530. During the first year of operation, the Bureau collected \$5,700,000. These increased collections mean more Indiana children are receiving the child support they deserve and that fewer Indiana families will have to resort to public assistance to survive.

At the end of June, 2004, there were 1,757 employers using the Child Support payment web site. Additionally, there were an uncounted number of employers remitting payments through electronic funds transfers. Electronic direct deposit of payments for distribution of collections was initiated in November, 2000. Electronic fund transfers from employers were initiated February 1999. Through the end of the calendar year 2004, an estimated \$455 million had been collected.

Each year, the Office of Child Support Enforcement (OSCO) reviews performance for order establishment, paternity establishment, current support collected, and cases paying on arrears. The performance-based audit standards were phased in between FFY 2000 and 2002. In each area performance is assessed by comparing the number of cases upon which action is to be taken with those upon which the required action has been taken, as reported in the ISETS database.

For example, for order establishment, the number of cases upon which orders need to be established is compared with the number of cases upon which an order has been established. The performance is measured as a percentage. Indiana continues to improve performance measure scores in all areas. This has resulted in increased incentives received by Indiana from the federal government. Please refer to the attached Indiana Statewide Performance and Incentives Report comparing Indiana's performance scores to the national averages as well as detailing Indiana's scores from 2000 – 2003. For SFY 2004, 47 Indiana counties were at or above the national average of 59% for current support. For specific county performance measures and scores please refer to the attached County Performance Measure report for FFY 2000 – 2004.

The reliability of Child Support data in the Indiana State Enforcement Tracking System (ISETS) determines the effectiveness of the Child Support Program and the incentive monies received. Regardless of how high Indiana's performance ratios are in the four substantive areas, in order to actually qualify for incentives. OCSE makes this determination by randomly selecting approximately 200 cases statewide. The paper case files are reviewed and compared to the ISETS system data, as of September 30. The auditors review the system data to ensure that, among other things, all court order information is reflected correctly in ISETS and that all paternity

Prepared by: Office of Data Management Source: Departm

indicators are accurate. Cases are reviewed for accuracy for each of the four substantive measures.

In 2001 data reliability issues were identified. There were a number of factors contributing to this issue. Factors included but were not limited to the following:

- 1) Data conversion from the prosecutors and clerk's data into the ISETS system.
- 2) Miscommunication between child support staff and local office staff resulting in incorrect paternity data codes being entered in the Indiana Client Eligibility System (ICES) thus affecting the paternity establishment percentage in the ICES/ISETS interface.
- 3) Insufficient data being entered into ICES for non-custodial parents resulting in the interface between ISETS and ICES creating an entire new case instead of linking to an existing case already in the system. This created duplicate cases.

In a successful effort to address the data reliability issues, state and county child support staff reviewed and corrected approximately 145,000 cases. Also, a training program for local office of family and children staff was initiated and developed with input from child support in an effort to address this issue on an on-going basis. These collaborations contributed to successful results in addressing the problem as documented in the Indiana Statewide Performance and Incentives Reports detailing the progressive improvement in the data reliability scores from Federal Fiscal Year 2000 – 2003.

Child Support Data

Prepared by:

Office of Data Management

Indiana State Enforcement Tracking System (ISETS) is a statewide reporting system for child support payments. The system collects, posts, and disperses support payments for all Indiana counties. Child Support data is tracked by court orders and reported by child support payments.

A court order could involve multiple children, multiple payers and or multiple families/households. Also, IV-D cases are tracked for federal reporting purposes but non IV-D cases are not. Consequently data regarding the total number of families and children served by this program is not available.

Indiana Support Enforcement Tracking System (ISETS)

Project Description

The Indiana Support Enforcement Tracking System (ISETS) is a federally mandated online, automated, and integrated case management and case tracking software system. ISETS supports Clerks and Prosecutors in all 92 of Indiana's counties to record, track, collect, and disburse court ordered child support payments. In addition, the ISETS integrates with other systems, agencies, and employers to enhance locate and payment efforts. These include:

- · Driver license suspensions:
- · Employer wage and UI withholdings;
- · TANF benefits recovery;
- · Federal and State tax offset collections:
- · Professional license suspensions; and
- · Credit bureau reporting.

ISETS is used primarily by county workers in each county's Clerk of Courts office and Child Support Prosecutor's Office. There are approximately 84 State staff located centrally in the Child Support Bureau, Department of Child Services, that use the system for central office functions of processing payments, balancing adjustments, answering inquiry calls, correspondence, central registry cases, and enforcement activities.

A team of trained technical professionals monitor and maintain the ISETS software to ensure that it conforms to all Federal and State regulations, laws, and requirements. The data housed within ISETS is used to comply with Federal reporting requirements. The ISETS system achieved full Federal certification from the Office of Child Support Enforcement for both FS88 and PRWORA certification objectives in July, 2002.

History

In 1992, IBM won a competitive bid contract to transfer the KASES system from Kentucky, modify it to meet Indiana's needs, and implement it as the ISETS system. During the ensuing 8 years, IBM left the contract and other vendors worked to implement the system county by county. In October, 1999, Marion County was the last county implemented thus completing the initial implementation of the system.

In 2000 and 2001, software modifications were completed to bring ISETS into full compliance with Federal certification requirements for both the FS88 and PRWORA legislations. Indiana formally received full Federal certification in March, 2002, the first state in the Midwest region to accomplish this task, and only the 17th state nationally to do so. Certification is an important hurdle as it assures the State of continued federal matching funds of over \$10.5 M annually.

Numbers and profiles of population served: Approximately 747,800 Child Support Cases

The project is guided by goals to: maintain ISETS system in compliance with all Federal and State regulations, laws, and requirements; ensure that ISETS system retains its full Federal certification; successfully transition the maintenance and support contract from Covansys to Deloitte Consulting with minimal downtime; maintain all 92 County IV-D data on the ISETS system; implement enhanced financial audit ability and tracking changes as outlined by the Indiana State Board of Accounts EDP audit of 2000; and replace IBM OfficeVision/400 software, which is obsolete and no longer supported by IBM.

Prepared by: Office of Data Management Source:

Department of Child Services

The following are discretionary goals that are dependent upon funding: Enhance the employer payment Internet application to support more employers and to streamline reporting; significantly modify ISETS to take advantage to Internet and browser-based software to improve usability and to streamline operations; modify the ISETS statewide telecom network to facilitate the Courthouse Connectivity initiative of the Indiana Technology Oversight Commission; and Consolidate the 99 ISETS AS/400 computers centrally onto new hardware in order to significantly reduce maintenance and software licensing costs.

The Bureau of Child Support has cooperative agreements with 90 local county prosecutors that provide child support enforcement services in all 92 counties. Through this partnership, Indiana's children are getting more of the money they deserve. Enforcement efforts produced \$454,873,530 in distributed child support collections in state fiscal year 2004. Indiana's enforcement efforts are not only successful, but efficient as well. Indiana children receive more child support for every dollar spent on administrative costs than any other state. The April 2004 issue of Governing magazine recognized Indiana as the number one state in the nation in child support collections per dollar of administrative costs spent in federal fiscal year 2002. The national average was \$4.13. Indiana collected \$7.80 for every dollar spent in administrative costs designated to operate Indiana's Child Support Program.

¹⁻ The current support measurement looks at the amount of support paid versus the amount of support due. It is not the percent of parents paying - it is the percent of the amount due that is collected.

It is possible for the same case to be included in both categories; or a case may only be in one - depending upon what was paid on their case.

Office of Data Management 6/21/2005

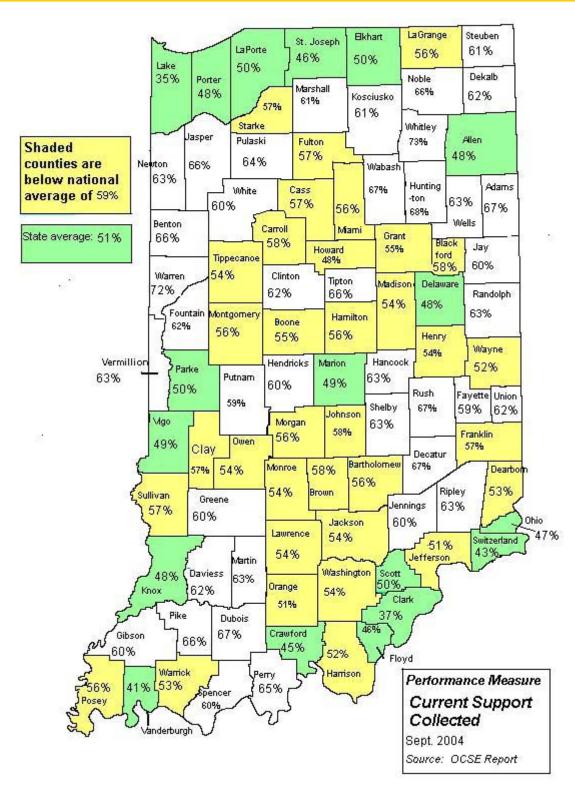

Prepared by:

²⁻ Cases paying on arrears looks at the number of cases with at least one payment on the arrears versus the number of cases where an arrears owed. It again, it is not a percent of parents paying since the same obligor could have multiple cases.
